

Markson Tang

Markson Tang has been involved in the clean energy sector since 2003 and had developed projects such as the world's first Microgrid with hybrid renewable energy sources such as Solar PV, a micro wind farm, energy storage and diesel generators, utility scale wind farms in Sri Lanka, micro grids in Vietnam and the Pulau Ubin Microgrid in Singapore. He has also worked with Airtel and partners to offer passive and active managed service to over 2000 telecommunication towers in Sri Lanka. He is now actively seeking to replicate the Pulau Ubin micro grid business model and replicating it across 1500 off grid locations in Myanmar using the telecommunication towers as a platform for the operation of the smart grid.
