

Jan von Appen  
Fraunhofer IEE  
[jan.vonappen@iee.fraunhofer.de](mailto:jan.vonappen@iee.fraunhofer.de)

Jan von Appen is head of the department Energy Management and Energy Efficiency at the Fraunhofer Institute for Energy Economics and Energy System Technology IEE in Kassel, Germany (formerly known as Fraunhofer IWES). Previously, he was a group manager in the department of Distribution System Operation at Fraunhofer IWES. He has also been a visiting researcher at the Lawrence Berkeley National Laboratory in Berkeley, CA, USA and at CSIRO, Newcastle, Australia. He holds a PhD in electrical engineering from the University of Kassel and a joint degree of business administration and electrical engineering from the Technische Universität Darmstadt. His work focuses on new control strategies for distributed energy resources to improve their grid integration. He is involved in several national and international research and consulting projects focusing on shaping the framework for efficient power system operation with high shares of renewable energy resources.
