

Hyeyoon Jeong  
KEPCO KDN

Hyeyoon Jeong graduated from Soongsil University in 2009 in electrical engineering. She first served as a SCADA engineer at ABB KOREA's Power Systems Division. Since 2013, she has been working on the platform design and development of a microgrid operating system at KEPCO KDN. Her main research interests are microgrids, big data, and deep learning application development.
