

Martti Ylikoski
Radio System Evolution Lead
Nokia

Martti leads the development of Nokia Community Hosted Network, a unique new way to cut the high expense of providing mobile connectivity in rural and remote areas.

<https://networks.nokia.com/community-hosted-network>

His previous activities at Nokia involve leading the building an IoT platform that was later successfully spun out as independent company as well several initiatives in remote care automation and field service digitalization. In addition, he has worked with billing mediation, as SOA toolset product manager and in system integration at Nokia. He has been working for Nokia over 20 years.

Before Nokia he has experience for a decade implementing software solutions for several Industries including print, retail, construction, travel and manufacturing.
