

Andreas Eberhard is well known in the international standards and power quality community. He is a member of various power quality standard committees around the world. Andreas holds two Master Degrees from Universities in Europe and the United States. He has more than 20 years of experience in product compliance and power quality instrumentation design. He worked more than 10 years for TUV Rheinland, an International Regulatory Company, in Europe and Asia before he joined PSL in Silicon Valley in 2005.

His latest work and studies are related to the impact of renewable energies on grid stability. With PSL he did develop and design a new Power Quality and microPMU measurement technology. This innovative technology will improve and change the way how Power Quality and Energy was traditionally monitored. He is Vice President of Technical Services at Power Standard Labs and can be contacted at aeberhard@powerstandards.com, or Tel ++1-510-522-4400.
