

Luis Manuel Alves

Title: Director

EDP Distribuição

Education: Degree in Electrical and Computers Engineering, University of Oporto;  
International Master of Business Administration (MBA) by Catolica Porto Business  
School - ESADE(Barcelona) - PUC(S.Paulo)

He is presently the assets and grid planning director of EDP Distribuição. He is a seasoned professional with more than 25 years of experience working in the Portuguese electrical sector. His professional background is mainly focused in two areas:

- the operational area regarding the supervision and management of the electrical network, with strong ties to the network studies focusing on subjects such as quality of service, network efficiency, risk assessment and contingency plans;
- the planning area where nowadays he is responsible for the definition of the grid investment and asset management plan and budget.

He has also been committed in research projects on which EDP Distribuição has been involved with other European institutions.
