

Xavier **VALLVÉ**

xavier.vallve@tta.com.es

Xavier Vallvé is co-founder (1986) and director of the consultancy firm Trama TecnoAmbiental (TTA) in Barcelona, Spain. He has been active as a practitioner and researcher for more than 25 years in renewable energy rural electrification and distributed generation projects, autonomous as well as grid tied, RE hybrid technology and micro grids for islands and isolated villages. This involves interdisciplinary activities in economic, social and management aspects as well as engineering in RE generation and storage.

He has been involved in feasibility studies, engineering and project management of many PV rural micro grids in isolated villages in Africa, Asia and South America for private and government clients and also for UNDP, UNIDO, UNEP, AECID, IDB, WB, EC, IRENA and other agencies.

He is also an active member in international codes and standards committees and teaching activities on this subject.
