

Chris Marnay
Lawrence Berkeley National Laboratory (LBNL)

Chris Marnay is a Senior Advisor to LBNL's China Group. He worked at LBNL for 29 years before retiring in 2013. He has worked for two decades in the microgrid area, and has been one of its most influential researchers, publishing over 100 academic papers on the topic. He was a member of the Consortium for Electric Reliability Solutions (CERTS) team that proposed the CERTS Microgrid concept. Notably in 2001, he proposed the Distributed Energy Resources Customer Adoption Model (DER-CAM), and led its development for over a decade. In 2005, he began the International Microgrid Symposium series, and chaired its first ten events. He also chaired the Conseil International des Grands Réseaux Électriques (CIGRÉ) Microgrid Evolution Roadmap Working Group for 2010-2015, and the Benefits Analysis section of the U.S.-China Climate Change Working Group on Smart Grids during 2014-2016. He is a Senior Editor of Applied Energy, and is an affiliate faculty member at U.C. Berkeley's Energy and Resources Group and at Tianjin University. He is also an Academic Advisor to the Centro de Energía at the University of Chile, and a Guest Researcher of the Chinese Academy of Sciences. He holds A.B., M.S., and Ph.D. degrees, all from the University of California, Berkeley.
