

[Mihaela M. Albu](#) graduated from Politehnica University of Bucharest (UPB) in 1987 and holds the Ph.D. degree (1998) from the same university. Since 2002 she is a Professor with the Department of Measurements, Electrical Engineering Faculty, UPB. She is the founder of MicroDERLab and coordinates several research teams working on projects funded by national and international agencies. Her work includes coordination of a monography (on measurements in power systems) and more than 150 journal and conference papers. She was on leave at Arizona State University as a Fulbright Fellow in 2002-2003 and in 2010. Her research interests include synchronized measurements, smart metering, power quality assessment and definitions for dc and hybrid microgrids. She is a member in several (IEC, IEEE) standardization groups and CIGRE committees. Since 2016 she is nominated Distinguished Lecturer of the IEEE Instrumentation and Measurement Society with a talk on Measurements for Smart Grids. Since 2019 she has been appointed Committee member for the IEEE Joseph F. Keithley Award in Instrumentation & Measurement. Currently she is member of the Romanian Advisory Board for Research-Development and Innovation – CCCDI, 2021-2025.
